From the inner end of the south pier, decribing a half moon, or semi-circle to the our end of the same pier, there is shoul auter, the depth being from o to 9 fact, running down to eleven and twelve feet in the changel, which as stated above, within about 100 feet in the narrowes: place of the north pier. By obseing the above no vessel will find any difficulty entering our harbor, or leaving it.

It will be seen from the above that even in it present state, out harbor is one of the most 'c cossible, as it is the roomiest on the Lake, and when the Straight Cut is completed, it will offer unequalled facilities for the rapidly increasing commerce of our Inland Seas.
